Summary

Ambitious Analyst with a "Doer" mindset, dedicated to driving business impact through AI automation and data-driven insights. 1.5+ years of experience in optimizing operational workflows and financial metrics. Expert in **SQL, Python, and Power BI**, with a deep passion for architecting scalable automations that bridge the gap between technical infrastructure and high-level business strategy (Revenue & Margins).

Professional Experience

SMGK DEVELOPERS PRIVATE LIMITED

Mumbai, India

Reporting & Business Operations Analyst

05/2022 - 11/2023

Real estate developer for residential and commercial projects in Mumbai, India.

- Increased internal reporting efficiency by 25% through the standardization of operational tracking sheets and status report formats.
- Reduced data inconsistencies by 35% by implementing validation checks and documentation controls.
- Improved inter-team coordination speed by 15% by maintaining structured tracking and reporting dashboards.
- Supported management decision-making with weekly performance updates and KPI summaries, impacting approximately 15 key projects.

Education

IU International University of Applied Sciences

Berlin, Germany

M.A. International Management

01/2024 - 12/2025

Bhakta Kavi Narsinh Mehta University (BKNMU)

Junagadh, India

Bachelor of Business Administration (BBA)

07/2019 - 04/2022

Projects

Multimodal Freight Decision Intelligence Dashboard (Germany) – Power BI

Germany

09/2024 - 12/2025

GitHub: Designed a decision-support dashboard integrating cost, CO₂ emissions, and transit time to evaluate trade-offs and support data-driven transport decisions.

- Developed an interactive Power BI dashboard to compare multiple options across key performance indicators, enabling structured evaluation of cost, sustainability, and operational efficiency.
- Built KPI-driven analytical framework to quantify trade-offs between cost, emissions, and time, treating them as isolated metrics.
- Identified and quantified critical insights, including 57.56% lower cost (Inland Waterway vs Road) and 77.59% lower CO₂ emissions (Rail vs Road) in the overall comparison view.
- Implemented scenario-based analysis to evaluate sensitivity of decisions under changing conditions (e.g., carbon pricing, fuel cost shifts, operational improvements).
- Designed a decision intelligence layer to recommend optimal choices based on combined performance across multiple criteria.
- Structured data model and DAX measures to support multi-dimensional analysis, reducing manual evaluation effort and enabling faster decision-making.

CSRD / ESRS Reporting Readiness & Data Quality Dashboard (Power BI)

Germany

12/2024 - 10/2025

GitHub: An ongoing project aimed at improving reporting governance and data quality.

- Developed a Power BI reporting model to assess ESG reporting readiness under CSRD/ESRS, achieving 83.33% data completeness of KPIs, 100.00% coverage of accountability and evidence, and a control pass rate of 60.00% as a basis for audit preparation.
- Structured ESG data using a star schema model (KPI, period, topic, responsible party, source) to ensure consistent definitions, traceability, and repeatable reporting cycles.
- Created executive and operational views to monitor data quality issues, control errors, and reporting gaps before audit or disclosure.

Skills

Technical Skills: Power BI • DAX • Data Modelling • Excel • Power Query • SQL • Tableau • Looker • Basic Python • Your Skill

Analytical & BI Skills: KPI Design • Data Analysis • Dashboard Development • Data Visualization • Scenario Analysis • Trade-off Analysis • Decision Support Systems

Leadership & Volunteer Experience

IU International University

Berlin, Germany

Student Representative

10/2024 - 10/2025

Supported student interests and coordinated university activities through effective communication and follow-up. Acted as a liaison between students and stakeholders, assisting in addressing and resolving issues. Demonstrated leadership in coordination and interaction.
