

MOHAMMAD M. KURESHI

Business Intelligence Consultant · Data Analyst · Analytics Engineering

+49 176 70651034 · mohd.kureshi04@gmail.com · linkedin.com/in/mohammad-kureshi · github.com/AIAnalyticsKureshi · Berlin / Hamburg

PROFESSIONAL SUMMARY

Business Intelligence Consultant and Data Analyst with 3+ years of experience owning the full analytics lifecycle — from requirements gathering and SQL data modelling to dbt-style transformation pipelines, dashboard development, and KPI governance. Proven ability to translate complex business questions into scalable analytical solutions that non-technical stakeholders actually use. Built end-to-end BI systems using SQL, Python ETL pipelines, Power BI with DAX, and data quality validation frameworks across Finance, Logistics, Supply Chain, and E-Commerce domains. Strong communicator with a structured, ownership-driven approach to analytics. English C2 professional. German A2/B1 actively improving. Full working rights in Germany. Open to Hamburg on-site, hybrid, or remote.

PORTFOLIO PROJECTS

FinSignal — Operational-Financial Early Warning System · github.com/AIAnalyticsKureshi/FinSignal

06/2026 – Present

Python · SQL · SQLite · dbt-style ETL · Power BI · DAX · Excel · Star Schema · Finance Analytics

- ▶ Owned the complete analytics lifecycle for a Finance Controlling intelligence system — gathering CFO and Controller requirements, designing a star schema data model (3 fact tables, 5 dimension tables, 9 indexes), building an automated ETL transformation pipeline, and delivering a self-service Power BI dashboard with 4 views for different stakeholder audiences.
- ▶ Developed and maintained a scalable SQL data model covering P&L structure from Revenue to EBIT across 2,340 GL entries and 18 months — documenting all KPI definitions, metric logic, and reporting standards as reusable analytics components, equivalent to dbt model documentation.
- ▶ Implemented an 8-point automated data quality framework that validates every data load before it reaches the reporting layer — checking referential integrity, null values, duplicate postings, period coverage, and date range integrity — achieving 100% data quality score across all checks.
- ▶ Built 20 certified SQL analytical queries covering Budget vs. Actual variance, P&L waterfall, YTD revenue tracking, rolling 3-month cost trends, cost centre ranking, contribution margin by product line, and scenario comparison — each with documented business logic and stakeholder context.
- ▶ Designed and deployed a signal detection engine that reads weekly operational data, calculates consumption pace vs. budget, and automatically inserts early warning alerts into the database — detecting 30 signals with an average of 25.6 days advance notice and protecting €2.84M in projected overruns.
- ▶ Currently building a 4-view Power BI dashboard (Executive Pulse, Variance Intelligence, Risk Register, Signal Intelligence) with DAX measures, bookmark navigation, conditional formatting, and an auto-generated CFO Controlling Memo — designed for self-service use across CFO, Controller, and Cost Centre Manager personas.

BI Control Tower — EuroTrade GmbH · github.com/AIAnalyticsKureshi/BI-Control-Tower-EuroTrade

03/2026 – 04/2026

SQL · Python · dbt-style Transformations · Power BI · DAX · Star Schema · Supply Chain Analytics · CSRD

- ▶ Designed and built a complete BI system for a European logistics company — translating supply chain and sustainability reporting requirements into a 6-table star schema, Python/Pandas ETL transformation pipeline with dbt-equivalent layer separation, and automated data quality validation achieving 100% DQ score.
- ▶ Created 15+ SQL analytical queries using CTEs, Window Functions, and RANK() to analyse supplier KPIs, cost ratios, and performance segments — documented with metric definitions and business context for non-technical stakeholder consumption.
- ▶ Built a 3-page Power BI dashboard with DAX measures, drill-through navigation, and dynamic KPI alerts governing €20M revenue, 29.74% net margin, and CO2/CSRD compliance reporting.
- ▶ Identified through analytical review that 19% of highest-cost transactions caused 75% of avoidable overhead — a quantified insight that demonstrates ability to surface actionable business value from data beyond standard reporting.

Multimodal Freight Decision Intelligence · github.com/AIAnalyticsKureshi/Multimodal-Freight-Decision-Intelligence 12/2025 – 02/2026

SQL · Python · Excel · Power BI · Scenario Modelling · Operations Analytics

- ▶ Built a decision-support analytics model comparing three transport modes across German freight corridors — integrating cost, speed, and CO2 metrics into a single certified analytical baseline with full documentation of data sources and transformation logic.
- ▶ Conducted scenario analysis showing 77.59% lower cost impact for rail vs. road on comparable corridors — translated findings into actionable management recommendations demonstrating the ability to communicate data insights to non-technical stakeholders.

PROFESSIONAL EXPERIENCE

Business Intelligence & Analytics Consultant · [InkWave \(Self-employed\)](#)

Berlin · 01/2025 – Present

Remote BI consultancy across 6 countries · E-Commerce, Retail, Logistics, Consulting

- ▶ Owned the full analytics lifecycle across 39+ BI and reporting projects for clients in Germany, UK, USA, Italy, France, and India — gathering requirements, building SQL data models, developing Power BI dashboards, and ensuring data quality before every delivery.

- ▶ Translated diverse business stakeholder requirements into scalable analytical solutions using Power BI, SQL, Excel models, and Python-based ETL pipelines — building reusable components and documentation standards that clients could maintain independently.
- ▶ Automated data transformation and reporting workflows, reducing client processing time by over 40% and improving reliability of recurring monthly reports — equivalent to dbt automation of manual SQL transformation steps.
- ▶ Validated financial and operational datasets using SQL, identified data quality issues proactively, and delivered certified, trusted data foundations for management reporting across multiple business domains.

Reporting & Data Analyst · Rhyno Foam Industries

Morbi, India · 06/2023 – 11/2023

ISO 9001:2015-certified manufacturer · Operational reporting across 4 teams

- ▶ Consolidated fragmented data from multiple source systems into unified management reports — maintaining a single source of truth for operational steering and monthly performance reporting, reducing rework by 30%.
- ▶ Led data quality validation processes, identified and resolved inconsistencies before management review — building stakeholder trust in data accuracy as the foundation for operational decisions.
- ▶ Built documentation standards and reporting templates that reduced onboarding time for new reporting users by 20% — an early example of analytics enablement and reusable component thinking.

Reporting & Business Operations Analyst · SMGK Developers Private Limited

Mumbai, India · 05/2022 – 11/2023

Real estate developer · Cross-functional data coordination across Construction, Sales, Finance

- ▶ Acted as the central analytics interface between three departments — structuring data requests, consolidating management reports, and supporting steering of 15+ concurrent projects with clear reporting frameworks.
- ▶ Reduced operational reporting effort by 32% through standardisation of report templates — enabling teams to self-serve on recurring reporting needs and freeing analyst capacity for strategic analysis.
- ▶ Established data validation and reconciliation checks in operational reports, improving data quality and strengthening stakeholder confidence in reporting as a basis for project decisions.

SKILLS & COMPETENCIES

Analytics Engineering & SQL: SQL (advanced) · CTEs · Window Functions · RANK() · JOINS · dbt (data transformation) · Data modelling · Star schema · Data warehouse concepts · Scalable reporting tables

Dashboard & BI Development: Power BI · DAX · Power Query · Tableau (familiar) · Looker (familiar) · KPI design · Conditional formatting · Drill-through · Bookmark navigation · Self-service analytics

Data Quality & Governance: Automated DQ validation · Referential integrity testing · KPI definition & documentation · Metric governance · Reporting standards · Reusable analytics components

ETL & Data Transformation: Python (Pandas) · dbt-equivalent transformation pipelines · Automated data loads · Source-to-report data flow design · Excel-based data preparation

Stakeholder & Communication: Requirements gathering · Business-to-data translation · Cross-functional collaboration · Technical & non-technical communication · Analytics documentation

Tools: Git · VS Code · Azure (awareness) · Microsoft Fabric (awareness) · Jira · Notion · Microsoft 365

EDUCATION

M.A. International Management · IU International University of Applied Sciences

Berlin · 01/2024 – 12/2025

Grade: 2.4 / Good

Bachelor of Business Administration (BBA) · Bhakta Kavi Narsinh Mehta University (BKNMU) Junagadh, India · 07/2019 – 04/2022

CERTIFICATIONS & TRAINING

- ▶ Microsoft PL-300 — Power BI Data Analyst Associate · Microsoft | In Progress, Expected August 2026
- ▶ DP-900: Microsoft Azure Data Fundamentals · Microsoft | In Progress, Expected August 2026
- ▶ Advanced Excel · IIFCA, Bangalore
- ▶ SQL for Data Analysis · DataCamp

LANGUAGES & AVAILABILITY
